

Year

13

Learning Journey

Mathematical skills studied are assessed in Learning Landmarks each half-term.

and networks I

Algorithms on graphs

Vectors Core one and

Algorithms

Polar Graphs / Methods in

Differential Equations

Graphs

Reducible differential equations / Route inspection / Conic sections one / Core one and two revision

Traveling salesperson / Numerical methods / Vectors / Inequalities / **Series and complex** numbers

A Level Further Mathematics

Series two / Methods in calculus / Volumes of revolution two

Complex numbers two / Argand diagrams / Hyperbolic functions

Series / Volumes of revolution / **Induction / Vectors**

The t formula / Linear programming / Simplex algorithm / **Conic sections two**

Taylor series / Methods in calculus / Critical path analyses / Revision

> Students will develop a range of skills at all stages of the course including:

ALevel

Exams

- Fluency in mathematical theory
- Problem solving
- Logical reasoning
- Analysis and presentation of data
- Application of knowledge
- Evaluation and drawing conclusions

Matrix transformations and matrices and planes

Complex numbers / Roots of polynomials

> Year 12
